

Assembly Instructions for the **BOTTLE BUDDY**[®] Water Storage System and Accessories

Bottle Buddy is a registered trademark of Tailor Made Products, Inc.

Premium Connector Kit

• **Important:** The Bottle Buddy is designed to be used on a firm, level surface. It is not designed to be used for storing bottled water on trucks or other moving vehicles.

• **Note:** When loading full bottles onto shelves, start from the bottom and load upwards until finished. When unloading full bottles, take down the top bottle on each stand and then each successive bottle downwards until empty.

Please read ALL instructions before assembling.

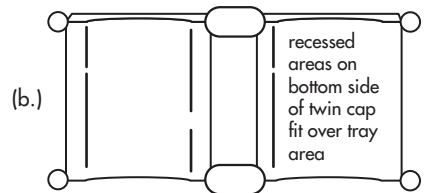

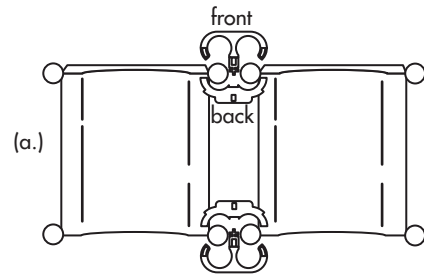

Each Case Contains:

 Twin Caps x 2

 Connector x 2
(2 fronts and 2 backs)

1. To combine multiple Bottle Buddy columns, you simply need to place a connector on adjacent column legs on the front and back, just above the bottom tray. Snap the front and back connector pieces into place. The smooth, rounded front piece of the connector should be facing outwards on the unit. The squared-off back piece should be facing inwards, towards the water bottles (figure a.)

2. If existing Bottle Buddy storage systems are being used, remove the four top caps that are on the adjacent column legs. Place a twin cap into the adjacent column legs on the front and backsides of the top tray. Gently tap the twin caps into the top holes with a small rubber mallet (figure b.)
